

PRICE PROTECTION FOR UNCERTAIN TIMES

The economy is the main headline on the news everyday. As a key decision maker, this isn't news to you any more. You deal with rising costs on a daily basis. The cost of doing business goes up, and availability of short-term credit goes down. The economic experts all seem to agree that it's going to take some time for things to stabilize.

You even feel the impact at home. Everyday items are escalating at an alarming rate. A recent article in the Boston Globe states that the price for staples are surging past double-digit rates. Milk prices for example, increased 26% over the last year. Egg prices jumped 40%.
